

FEATURES

The line filters HGN 369-X-2X are used in applications having the ON/OFF-switch on front-side but mains input at the rear-side. IEC-connector, voltage-selector for two different voltages, two fuses 5 x 20 mm and a highly efficient filter in a totally enclosed metal housing ensure best attenuation e.g. in instruments, scales, 19"-slide-in-units a.s.o. For applications no leakage current is allowed, we deliver our filters without Y-capacitors optionally. Parts are delivered without fuse(s).

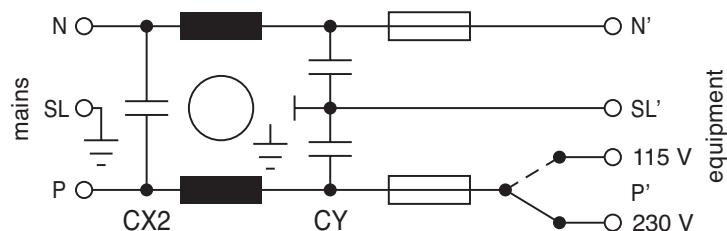

APPLICATIONS

Computer & networking equipment, Measuring & control equipment, Data processing equipment, laboratory instruments, Switching power supplies, other electronic equipment.
