

EU-Directive No. 1272/2008 Regulation on Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH), based on REACH Authorisation list 15.01.2019

Ferratec AG imports products from EU countries and countries outside the EU. According to the REACH-regulation material must be registered only when substances are released out of the product.

EU No. 1907/2006; Article 7 Paragraph 1:

The importer shall submit to the agency concerning substances contained in the products if following two conditions are met:

- *The substance is present in the parts in total more than 1 tonne per year and importer.*
- *The substance releases under normal or reasonably foreseeable conditions of use*

If the release of a substance is not foreseen, but however (with normal or foreseeable conditions of use) can't be ruled out, an application to the agency is required if all the following three conditions are met:

- *Substances of very high concern, a list of these substances (candidate list) was published on June 1, 2009 by the agency and supplemented several times, last time on 15.01.2019*
- *Present in the product at a concentration of over 0.1%*
- *Contained in the product in a total amount of more than 1 tonne per year and importer*

Our products: ferrules, CEE plugs and combinations, braided hoses, cables, cable ties, cable lugs, cable processing tools, clamps, leadframes, magnets, tweezers, pneumatic parts, heat-shrink tubing, connectors, disc springs, transformers etc. can't be assumed, that under normal and foreseeable conditions of use substances will be released.

Therefore to us no obligations result under Article 7 Paragraph 1.

To our knowledge, our products don't contain listed substances above 0.1%. According to this a registration in the REACH agency is not obligatory.

RoHS-conformity (EU RoHS Directive 2015/863/EU, extension 2011/65/EU)

To our knowledge we hereby confirm all our products according to business correspondence comply with the provisions of Directive 2015/863/EU.
